Work Authorization (if applicable): Authorized to work as a remote international contractor.

Senior React Native Engineer with 7+ years of experience building, modernizing, and operating mobile applications used at scale by US companies. Proven record of translating technical execution into measurable business outcomes — significantly reducing crash rates, cutting production defects by 40%+, and protecting hundreds of thousands of dollars in revenue through rapid incident response. Trusted owner of performance optimization, accessibility compliance, and large-scale refactors in high-stakes, revenue-critical systems.

EXPERIENCE

Victoria's Secret | Bangalore, India

Jan 2024 – Dec 2025

Senior Software Engineer (React Native)

- Engineered core infrastructure optimizations (FlatList virtualization, memoization) that reduced crash rates by 35% and improved scroll performance in key revenue flows (PLP, cart), enhancing stability for critical purchase funnels.
- Protected revenue as primary on-call engineer; diagnosed and shipped a same-day fix for a critical payment gateway failure during a peak sales event, restoring functionality within 50 minutes and preventing an estimated \$300K+ in abandoned cart revenue.
- Orchestrated a phased, feature-flagged refactor of ~30% of a legacy codebase while maintaining a bi-weekly release cadence, de-risking the migration and increasing subsequent team velocity on modernized modules by ~20%.
- Spearheaded a "stable core" quality initiative, increasing critical-path test coverage from 39% to 80%.
- Fixed customer-reported production defects by 80% QoQ, which cut weekly engineering time spent on hotfixes by an estimated 35 hours.
- Solely owned WCAG 2.2 AA compliance for the checkout funnel, resolving critical accessibility blockers ahead of a legal deadline to eliminate litigation risk and ensure on-schedule releases.
- Built Scalable Quality Guardrails: Spearheaded adoption of Jest and React Native Testing Library, increasing test coverage for critical user journeys from 35% to over 80%. This established a safety net that reduced regression escape rate by ~50%, enabling confident, high-frequency releases.

Infosys for Client: British Telecom | Bangalore, India

Nov 2021 – Jan 2024

Senior Software Engineer (React Native)

- Modernized a large-scale legacy application serving 70K+ users by leading migration to React hooks and standardizing state management, reducing feature development cycle time by ~10%.
- Enhanced system reliability by designing consistent state management patterns across complex enterprise workflows, cutting production hotfixes by 34%.
- Optimized performance for a field workforce, improving Time to Interactive (TTI) by ~15% on high-traffic screens to increase daily operational efficiency.
- Scaled team impact by mentoring 4 junior engineers and building a shared component library adopted by 2 adjacent feature teams.

Caliper Business Solutions | Bangalore, India

Nov 2021 – Jan 2024

Senior Software Engineer (React Native)

- Introduced react hooks based approach thus replacing class based components, fixed about 50% of existing issues and increased dev velocity for future features (planning to execution)

ProcMeet | Bangalore, India

Nov 2021 – Jan 2024

Software Engineer

- Implemented calendar-based scheduling flows with complex UI state.
- Migrated an existing application to React Native.

MySchoolPage | Bangalore, India**July 2019 – Sep 2020****Mobile Developer**

- Architected and built the company's flagship React Native app from scratch, establishing core navigation, and state management.
- Developed and maintained reusable component libraries for a user base of 5,000+ students and educators.
- Optimized app performance for diverse devices, achieving a 20% reduction in Time to Interactive (TTI) on key screens to ensure a smooth experience.
- Designed and shipped a student assignment submission module.
- Established a CI/CD pipeline with GitHub Actions, automating builds and reducing manual release preparation time.

GlowRoad by Amazon | Bangalore, India**Nov 2018 – Jun 2019****Software Developer**

- Contributed to the foundational React Native migration of a large-scale consumer marketplace app, called myshopprime, implementing core navigation and deep-linking flows prior to the company's acquisition by Amazon.

EDUCATION & CREDENTIALS

B.E. Computer Science & Engineering: MVJ College of Engineering, Bangalore | 2011 – 2017**SKILLS & INVOLVEMENT**

Languages: JavaScript (ES6+), TypeScript**Frameworks:** React Native, React, Redux**DevOps:** GitHub Actions, Netlify, Vercel**Monitoring:** Sentry**Version Control:** Git, GitHub, Bitbucket/ Stash**Tools:** Jest, React Native Testing Library, React DevTools, iOS/Android Performance Profiling
