

S Lalith Narayan Kashyap

Lead Front End Developer

+91 9902355667 sanagaramkashyap@gmail.com linkedin.com/in/lalith-narayan-kashyap-b005a718 Bangalore, India

SUMMARY

Results-driven Frontend Engineering Lead with expertise in React, Redux, and scalable UI architectures. Proven ability to optimize legacy systems, enhance performance, and drive development efficiency. Skilled in PWA development and MVC design, delivering high-performing, intuitive user experiences. A go-getter who excels in leading teams, streamlining workflows, and aligning frontend strategies with business goals to drive innovation and growth.

SKILLS

JavaScript (ES6+), React JS, React Native, Redux, HTML5, CSS3, TypeScript, Angular JS, Technology Roadmap Planning, Process Optimization

EXPERIENCE

Senior Front End Developer SDE 3

Bangalore, India

Plivo

12/2021 - 12/2024

- Led a frontend team to develop Plivo CX Engage, optimizing customer engagement workflows and reducing response times by more than 20%, resulting in improved customer interactions and increased operational efficiency.
- Planned and implemented a scalable modular frontend system using React, Zustand, Typescript and Vite, reducing application downtime by 25% and improving development velocity.
- Developed a robust component library with Radix, TailwindCSS, and ShadCN, ensuring design consistency across multiple products and reducing UI development time by 40%.
- Collaborated closely with backend and design teams to create a seamless user experience, refining API interactions, reducing network overhead, and aligning frontend architecture with business goals.
- Experimented with AI-driven tools in development workflows, automating repetitive tasks, improving code quality, enhancing developer productivity, and increasing the efficiency of code reviews.
- Led and scaled a high-performing frontend team, mentoring engineers, driving best practices, and improving development velocity. Played a key role in hiring and onboarding, ensuring team alignment with business objectives.
- Implemented Playwright for end-to-end testing, reducing regression issues in production by 40%.

Senior Software Engineer

Bangalore, India

Trakstar Hire (Recruiterbox)

07/2019 - 12/2021

- Contributed to the migration from Backbone.js to React and Redux, improving maintainability and enabling a more modern UI architecture
- Implemented and optimized Redux-based state management, ensuring better performance and a predictable, scalable frontend application
- Refactored and maintained a complex legacy codebase, reducing technical debt and improving overall code quality and readability
- Optimized application performance, reducing JavaScript bundle size by 35% and improving page load times for a smoother user experience
- Participated in code reviews and knowledge-sharing sessions, helping maintain high-quality coding standards across the team
- Collaborated with cross-functional teams in an Agile environment, ensuring smooth feature rollouts and timely UI improvements
- Structured automated test suites using Jest and Cypress, improving test efficiency in CI/CD pipelines

Senior Software Engineer

Bangalore, India

Dataglen

06/2017 - 07/2019

- Created a new product from scratch using React, Redux, and Bootstrap, delivering a scalable and user-friendly interface.
- Solely developed and maintained the company's corporate website, implementing SEO best practices improving visibility and search rankings.
- Managed the complete frontend development lifecycle, ensuring high performance, maintainability, and seamless integration with backend systems.
- Optimized UI components and application structure, enhancing responsiveness and user experience across devices.
- Monitored application performance metrics, identifying bottlenecks and reducing page load times by 15%.
- Rendered real-time energy data visualizations, enabling seamless monitoring and decision-making.
- Tested and debugged frontend integrations to ensure smooth API communication.

EXPERIENCE

Software Engineer

Moonraft Innovation Labs

Bangalore, India

01/2015 - 06/2017

- Developed interactive UIs using Semantic HTML, jQuery, CSS, Sass, and Less, enhancing user experience and maintainability
- Built hybrid mobile applications with Cordova and Ionic, enabling cross-platform compatibility and reducing development time
- Optimized frontend workflows by integrating build tools like webpack, Gulp and Grunt, automating tasks and improving build efficiency

EDUCATION

Bachelor's Degree in Electrical Engineering

University Visvesvaraya College of Engineering

Bangalore, India

09/2010 - 07/2014

PERSONAL PROJECTS

Zone manager

Tech Stack : React Native, Firebase, Push Notifications

A mobile application enabling communication between M.L. As' and their constituents.

- Achieved 1000+ downloads on Google Play Store.
- Designed and developed a React Native application for seamless interaction, feedback submission, and constituency tracking.
- Integrated a real-time notification system to keep users informed of events and updates.

Tuition.in

Tech Stack : React, Redux, Node.js, AWS

An e-learning platform connecting users with educational content.

- Achieved 5000+ downloads on Google Play Store.
- Boosted user access by 30% through a web and mobile app for curated course videos.

Nitstone.com

Tech Stack : PHP, Laravel, Vue.js, NoSQL

A loan management web application for an NBFC.

- Increased loan leads captured by 25% by building an admin console and a user-facing dashboard.

Orange Self Storage

Tech Stack : React, Next.js, PostgreSQL, Stripe API

A self-storage management web application

- Built an end-to-end system for client management, payments, and automated reminders.
